

Augusto Carlos Devesa

Senior Project Manager | Technology Integration, Cloud & National-Scale Operations

Buenos Aires, Argentina | augustod@gmail.com | +54 9 11 3854 3260 | linkedin.com/in/augustodevesa

CV updated: September 2026

PROFESSIONAL SUMMARY

Telecommunications Engineer with 18+ years of experience in technology and telecommunications projects and over a decade leading projects directly. I combine senior project management (PMBOK, hybrid and agile frameworks: Scrum, Kanban, Disciplined Agile) with genuine hands-on technical capability in systems and network integration, cloud infrastructure, APIs, and automation.

I led a national connectivity program covering approximately 9,700 schools, with 9,500 installation interventions and 12,000 maintenance interventions executed over 20 months, exceeding the target of 700 successful interventions per month. I co-founded and managed a medical technology startup that brought a laparoscopic simulator and 3D-printed anatomical models to market.

Earlier, at Telefónica, I owned the integration, launch, and operation of digital services across five countries, serving 1.5 million users at 99.5% platform availability.

CORE COMPETENCIES

Project management: planning and baselines; work breakdown structure (WBS); scheduling and dependencies; risk and issue management; change control; governance and executive reporting; stakeholder management; budget and per-deliverable financial traceability; contractor and vendor management; deliverables and acceptance criteria.

Frameworks: PMBOK; hybrid delivery (waterfall for procurement, provisioning, logistics, and closure; agile for field execution); Scrum; Kanban; Disciplined Agile; Lean Startup; continuous improvement and retrospectives.

Integration and architecture: systems and network integration (voice, messaging, data, IP telephony, Wi-Fi); REST APIs; webhooks and signature validation; architecture documentation and technical decision records.

Data and automation: SQL and relational modeling; SQLite; PowerShell automation; automated document generation (Markdown → HTML → headless PDF); Python for integrations and scripting; Git and version control.

Operations: large-scale field deployment; logistics, materials, and equipment; 50+ contractor accounts; support desk implementation and field follow-up; service level and availability management; operation and restoration of critical services.

Domains: telecommunications (voice, messaging, data, IP telephony, networking); medical technology and healthcare; education; retail; energy; B2B corporate services.

PROFESSIONAL EXPERIENCE

Senior Project Manager | OCPTECH

Aug 2022 – Present | Buenos Aires, Argentina

- Responsible for business systems integration across the lead-to-cash flow (Mar 2025 – present): scope, cross-system dependencies, and risks and issues.
- National school technology-floor program (Aug 2022 – Mar 2025), client Educ.Ar / Ministry of Education of Argentina: Wi-Fi infrastructure installation and maintenance across approximately 9,700 schools, with a target of 700 successful interventions per month —exceeded during execution— and operational, quality, contractor, and financial control.
- Led an interdisciplinary team of 11 coordination roles (controller, infrastructure, support desk, and operations) plus approximately 50 contractor accounts.
- Designed and coordinated the hybrid delivery model: procurement, provisioning, logistics, closure, and billing as waterfall; intervention execution in agile cycles, each sprint delivering a batch of completed schools.
- Executed 9,500 installation interventions and 12,000 maintenance interventions (21,500 in total) over 20 months, averaging 1,075 interventions per month: the 700-per-month target was exceeded by more than 50%.
- Defined every intervention as a formal deliverable under an acceptance manual approved by both parties, backed by contractor agreements and customer billing certifications; also owned executive reporting, risk and issue management, and the operational interface with the client.

Co-founder & Project Manager | MedicalBit / MedicalSim

Jan 2021 – Jul 2022 | Medical technology startup, Buenos Aires, Argentina

- Led the project from concept to market with a 6-person team: scope, product roadmap, iterative validation with medical advisors, backlog prioritization, budget (approximately USD 5,000), risk management, and commercial launch; coordinated software, hardware, design, and 3D printing activities under a Lean Startup / Agile approach.
- Delivered patient-specific 3D anatomical models for approximately 50 clinical cases (oncology, peripheral cardiovascular surgery, gynecology, and urology), reducing surgical time by up to 1 hour in applicable cases.
- The laparoscopic simulator completed demo and hardware/software MVP phases, with operating manuals and a production-ready product. Units were sold to institutions including Hospital Italiano de Buenos Aires, Hospital Privado de Mar del Plata, and the Argentine Society of Gynecology.

Project Manager | IG Networks

Apr 2019 – Dec 2020 | Buenos Aires, Argentina

- Responsible for the end-to-end execution of customer service activation, deactivation, and modification projects.
- Single point of contact for the client and for contractors, coordinating the activities of the different teams during the implementation period.

Integration Engineer | Telefónica / Movistar (Novum program)

Feb 2017 – Aug 2018 | Argentina, Spain, Israel, and Brazil

- Digital transformation program that unified the customer experience across Latam operators through the Mi Movistar app, targeting growth from 800 thousand to 2.5 million active users.

- Coordinated integration activities between operator core network platforms and the application backend, with teams distributed across Israel, Madrid, Brazil, and Buenos Aires; owned integration of the communications pillar (voice and messaging) and facilitated the accounts and support integrations.
- Defined integration scope and dependencies, aligned technical and business stakeholders, managed risks and issues, validated operational readiness before each release, and supported user migration.

Carrier Coordinator | MovistarTU / TU Go (Telefónica)

Apr 2014 – Mar 2017 | Over-the-top communications service

- Responsible for integration, launch, and operation of the service in Argentina, Peru, Colombia, Mexico, and the Caribbean.
- The service reached 1.5 million users from zero with 99.5% platform availability and a restoration time under 2 hours; managed multi-country operations, incident resolution, and coordination with network and core teams.

Product Manager | Telefónica de Argentina, Corporate Segment

Jan 2012 – May 2014 | Buenos Aires, Argentina

- Responsible for development agreements with partners (Cisco, Avaya, Siemens, and others) for reselling communications, infrastructure, and networking solutions.
- Met the segment's annual sales budget of USD 8 million.

Project Manager | Telefónica Empresas

2006 – Dec 2011 | Buenos Aires, Argentina

Deployment of communications and infrastructure projects for the Industry, Healthcare, and Services segments. Key projects:

- McDonald's: IP telephony and network infrastructure across 150 locations; DOT – Baires Shopping: IP telephony and network for the site opening.
- Carrefour: network infrastructure across 200 retail locations; MetroGas: 400-point telemetry network and its core systems.
- Halliburton and Barrick Gold: IP telephony deployment and migration plus network infrastructure; Municipality of Tandil: metered parking solution.

EDUCATION

- **Telecommunications Engineer** | Universidad Argentina de la Empresa (UADE) | Diploma: 22 Oct 2015
- **Agile Project and Product Management Diploma (80 h)** | ITBA, Graduate School | Completed: 31 Oct 2018
- **Postgraduate Program in Project Management (90 h)** | Universidad Tecnológica Nacional (UTN), FRBA, e-Learning Center | 2009 version
- **Electronic Engineering (partial studies)** | Universidad Tecnológica Nacional (UTN) | 2008

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

In progress

- **PMP – Project Management Professional (PMI)**: certification process underway. Eligibility supported by 36+ months of non-overlapping project leadership experience and 170 hours of project management training (ITBA 80 h + UTN 90 h).
- **Microsoft path**: PL-200 (Power Platform Functional Consultant) → PL-600 (Power Platform Solution Architect); AZ-104 (Azure Administrator) → Azure Solutions Architect Expert.
- **Splunk**: Core Certified Consultant certification path (study and technical documentation).

Applied training (demo projects)

- **Disciplined Agile (PMI)**: study of the framework and of the DASSM Examination Content Outline.
- **Oracle Cloud Infrastructure**: design and hands-on build of a complete architecture on the Always Free tier (network, ARM compute, OCI CLI).
- **Mercado Pago**: Checkout Pro, Orders API, webhook signature validation, marketplace with OAuth and PKCE.

PERSONAL TECHNICAL PROJECTS (2025 – 2026)

- **Hermes architecture on Oracle Cloud Infrastructure**: VCN 10.0.0.0/16, public subnet, Internet Gateway, route table, and security lists; two ARM Ampere A1 instances running Ubuntu 24.04 LTS; API Key authentication, SSH with ed25519 keys, and provisioning automated with OCI CLI.
- **Mercado Pago payment integration**: Checkout Pro (Preferences API, back_urls, auto_return), Checkout API via Orders (X-Idempotency-Key, card tokenization), webhooks with x-signature / x-request-id signature validation, outgoing transfers and payouts, and multi-seller marketplace with OAuth and marketplace_fee.
- **Bilingual PMaaS site and PMP knowledge base**: Next.js and Tailwind CSS with ES/EN content and an auditable knowledge base for PMP certification (application documents, gap analysis, and study notes).
- **md2pdf tool**: PowerShell automation that converts Markdown to self-contained HTML and then to PDF using headless Edge/Chrome, with no external dependencies and no administrator privileges.

LANGUAGES

- **Spanish**: native.
- **English**: advanced (reading, writing, and technical presentations).
